

Universal CpGs (Edgar) and breast non-variable CpGs

Breast invariants
(Normal+Adjacent)

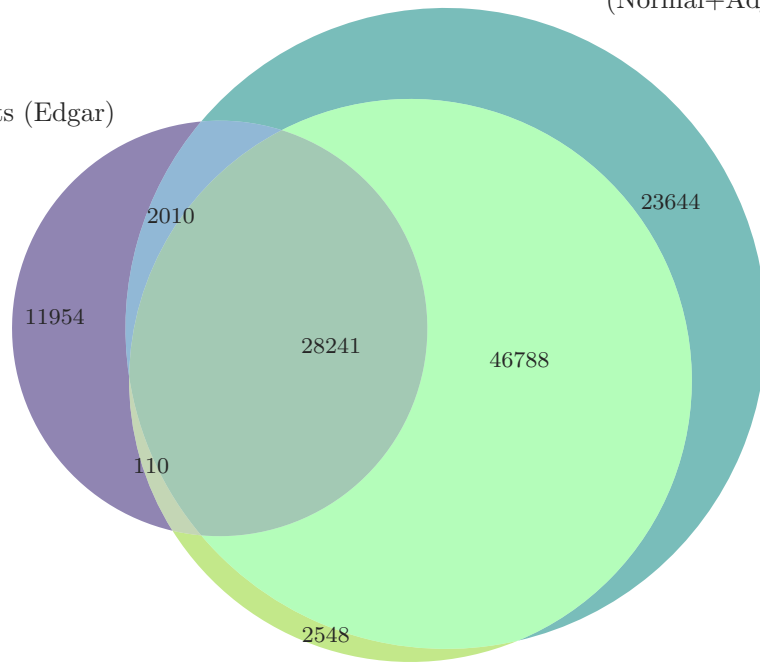

Biological interpretation

Core invariants:
 $\text{Edgar} \cap \text{N+A} \cap \text{N+T}$

Universal $\cap$ N+A,
variable when Tumor is added

Breast-specific invariants:
 $\text{N+A} \cap \text{N+T}$ (non-universal)

Universal invariants (Edgar)

Breast invariants (Normal+Tumor)
