

Universal invariants (Edgar)

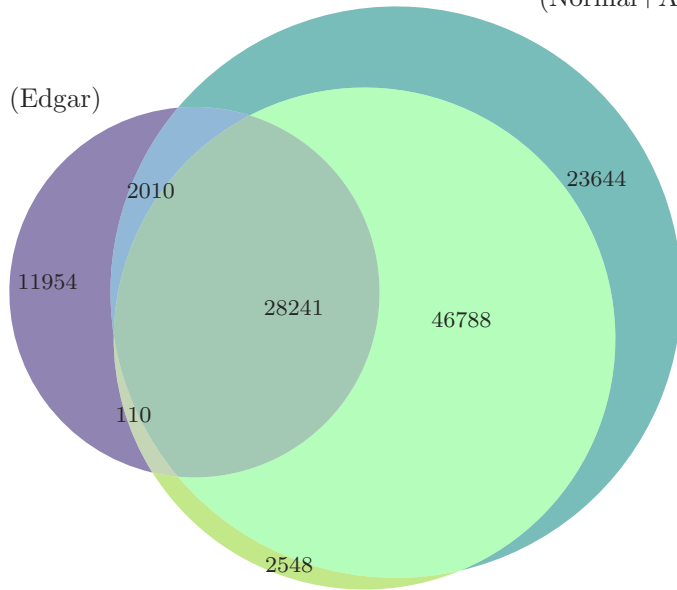

Breast invariants
(Normal+Adjacent)

Biological interpretation

Core invariants ($n = 28,241$):
 $\text{Edgar} \cap \text{N+A} \cap \text{N+T}$

Universal $\cap$ N+A ($n = 2,010$):
variable when Tumor is added

Breast-specific invariants ($n = 46,788$):
 $\text{N+A} \cap \text{N+T}$ (non-universal)

Breast invariants (Normal+Tumor)
